## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **LISTING OF CLAIMS:**

1. (Original) A tailgate assembly for a motor vehicle, said tailgate assembly comprising:

an integrally formed inner structural panel including a support surface, opposing upper and lower walls extending laterally along said support surface, a pair of end walls extending between said upper and lower walls, and a plurality of ribs spaced apart and disposed between said upper and lower walls and extending laterally between said end walls;

a reinforcing panel secured to said inner structural panel between at least two of said plurality of ribs providing a box structure; and

an outer panel overlying said reinforcing panel and extending between said upper and lower walls and said end walls.

- 2. (Original) A tailgate assembly as set forth in claim 1 wherein each of said plurality of ribs includes a top flange for receiving said reinforcing panel therealong.
- 3. (Original) A tailgate assembly as set forth in claim 2 wherein said inner structural panel includes a plane rib extending laterally along said support surface adjacent to and spaced apart from said lower wall.
- 4. (Original) A tailgate assembly as set forth in claim 3 wherein said inner structural panel further includes a non-linear support rib extending between said plane rib and said lower wall.

Reply to Office action dated December 2, 2004

5. (Original) A tailgate assembly as set forth in claim 4 including a top rail cap secured over said outer panel and said inner structural panel for providing said tailgate

assembly with a finished appearance.

6. (Currently Amended) A tailgate assembly as set forth in claim 5 wherein said

outer panel includes a lip [[flanges]] flange extending over said [[upper and]] lower [[walls]]

wall securing said outer panel to said inner structural panel.

7. (Original) A tailgate assembly as set forth in claim 6 wherein said inner structural

panel includes a loading surface opposite said support surface defining a plurality of recesses.

8. (Original) A tailgate assembly as set forth in claim 7 wherein said inner structural

panel is formed from a thermoplastic material.

9. (Original) A tailgate assembly as set forth in claim 8 wherein said reinforcing

panel is formed from a reinforced organic material.

10. (Currently Amended) An inner structural panel for a tailgate assembly of a motor

vehicle, said inner structural panel comprising:

a support surface having a plurality of spaced apart ribs extending laterally [[along]]

from said support surface to a free distal end; and

a reinforcing panel secured to said distal end of at least two of said plurality of ribs to

box said inner structural panel.

11. (Currently Amended) An inner structural panel as set forth in claim 10 wherein

each of said plurality of ribs includes a top flange extending transverse from said distal end

thereof for receiving said reinforcing panel therealong.

12. (Original) An inner structural panel as set forth in claim 11 including spaced apart

upper and lower walls extending laterally along said support surface.

Reply to Office action dated December 2, 2004

13. (Original) An inner structural panel as set forth in claim 12 including a pair of

end walls extending longitudinally along said support surface between said upper and lower

walls.

14. (Original) An inner structural panel as set forth in claim 13 including a plane rib

extending laterally along said support surface adjacent to and spaced apart from said lower

wall.

15. (Original) An inner structural panel as set forth in claim 14 including a non-linear

support rib extending between said plane rib and said lower wall.

16. (Original) An inner structural panel as set forth in claim 15 including a top rail

cap secured over an outer panel and said upper wall for providing the tailgate assembly with a

finished appearance.

17. (Original) An inner structural panel as set forth in claim 16 including a loading

surface opposite said support surface defining a plurality of recesses.

18. (Original) An inner structural panel as set forth in claim 17 wherein said

reinforcing panel is formed from a reinforced organic material.
